EDUCATION

- **BS Computer Science**, Mapúa University, Makati City **2024 – Present (Expected 2027)**
- **BS Physics**, Mapúa University, Manila City **2023 – 2024**

WORK HISTORY

Cybersecurity Intern, KPMG Philippines, Makati City Aug 2026 – Present

- Support cybersecurity risk assessments and control testing for client engagements, apply security frameworks and best practices to help protect organizational systems and data.

Full-Stack Developer Head Intern, Pru Life UK, Pasig City Apr 2026 – Aug 2026

- Built a full-stack Unified Internship Workflow Management Platform using React, Express, MongoDB with a REST API and JWT-based authentication, supporting clock-in/out, attendance tracking, and employee monitoring for internal company use.
- Set up Docker development and production environments, cutting environment setup time and compute resource usage by ~40%.
- Promoted to Head Intern to mentor and onboard team members; shipped 21 production features, conducted 20 code reviews, and managed deployments using Kanban methodology.

Software Engineer Intern, CloudSwyft Global Systems, Inc., Makati City Dec 2025 – Mar 2026

- Debugged Open edX Micro-Frontend modules using React, Django, and Tailwind CSS, cutting recurring issues by 20–30%.
- Designed the base Entity-Relationship Diagram (ERD) and improved debugging/testing processes, reducing average issue resolution time by ~25%.

PROJECTS

Alumna AI – KPMG Philippines Academic Innovation Challenge

- Designed and built an AI-powered study planning assistant using Microsoft Copilot Studio and built Power Automate workflows for dynamic task scheduling and reminders.
- Developed a centralized Power Apps dashboard and collaborated with a multidisciplinary hackathon team.

Unified Internship Workflow Management Platform – Pru Life UK – Black Orcas Summit Life Agency

- Designed architecture for an internship workflow platform integrating attendance, tasks, and communication.
- Built using React, Express.js, MongoDB, JWT, and Vercel architecture; with Google Workspace integrations and role-based access control.

RentCheck – Rental Management System – Software Engineering 1 Project

- Developed a full-stack rental management system for tenant data and rental payments using React, TypeScript, Vite, and Firebase.
- Implemented CRUD operations and CI/CD deployment to Firebase, reducing deployment time by ~70% and manual tracking effort by ~40%.

CRUD Web Page for SK Barangay Esperanza Ilaya – Web Systems 2 Project

- Built a web-based system to digitize barangay records, announcements, and administrative processes using PHP and MySQL.
- Implemented CRUD functionality, Railway deployment, and Docker Compose to streamline consistent development environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, Java, C++, C, PHP, SQL

Frameworks & Libraries: React, Node.js, Express, Django, Tailwind CSS, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Cloud & DevOps: AWS, Azure, Docker, CI/CD, Linux, Firebase, Vercel, Railway, GitHub

Tools & Platforms: Power BI, Power Apps, Microsoft Copilot Studio, Vite
